The HPS Public Art Planning Team and the Hunters Point Shipyard Citizen's Advisory Committee (CAC) invite you to participate in a public art workshop for the Hunters Point Shipyard, a project of the San Francisco Redevelopment Agency.

The purpose of this public workshop is to get your input to determine what public art will be on the Shipyard. We will review and build upon the considerable work done to-date as part of the CHRP, which identifies preliminary ideas for artists to create public art that recognizes and integrates the cultural and historical features of the Shipyard and becomes part of this new neighborhood overlooking the San Francisco Bay.

We need your input - we are on a fast track to install public art by August 2010.
